**GARBAGE CART**

**Article No.** 10118763  
**Description** Garbage Cart 400 L Green with Cover  
**Dimensions (mm)** A : 123  
**Weight (kg)** 30.7

**Features:**  
- Made from HDPE plastic  
- Equipped with solid rubber wheel and two locking swivel wheel  
- Large Capacity (400 L)  
- Colour : Dark Green

**Article No.** 10133747  
**Description** Wheel with Brake  
**Weight (kg)** -

**MANUAL DRAIN CLEANER**

**Features:**  
- Nonconductive fiberglass rods can be screwed together to form longer length for running wire through walls, attics, crawl spaces, sub-floors and suspended ceilings

**Article No.** 10212910  
**Description** Toilet Auger 9mm x 1m  
**Dimensions (mm)** 1160 x 32 x 20  
**Weight (kg)** 2.7

**Features:**  
- Clears household drains with a burst of air. Simply pump the air drain blaster and release the trigger to clear the clog.  
- 4 drain size attachments

**Article No.** 10212721  
**Description** Portable Air Drain Cleaner  
**Dimensions (mm)** 300 x 290 x 95  
**Weight (kg)** 8.7

**Features:**  
- Quickly removes obstructions and cleans your drains with ease!  
- Removes obstructions such as hair, vegetable dregs, food bugs, and mud, and many other non-hard materials.

**Article No.** 10212720  
**Description** Drain Cleaner 6.3mm x 7.5m with Drill Shaft  
**Dimensions (mm)** 520 x 290 x 170  
**Weight (kg)** 7.2

**Features:**  
- for small or medium household drains, have any easy spin with affirm grip handle, the high grade carbon, non-kink, rust resistant spring steel wire power through clogs efficiently, self-storing plastic canister.  
- Cable size : Ø6.3mm x 7.5m

ELECTRIC DRAIN CLEANER and VACUUM CLEANER

Features:
• The unique model design satisfies requirements for different operating
• Automatic device effect feeding and backing with maximum speed of 5m/min
• Applicable of both indoor and outdoor small pipes of Ø20-65 mm (3/4"-2.5")
• Longest cleaning length is 7.6 m

Included:
• Ø10mm x 7.6m soft shafts
• Automatic device
• Frame

Features:
• Applicable for all kids of indoor pipes of Ø20-100 mm (3/4"-4")
• Longest cleaning length is 30 meters
• With additional accessories

Included:
• 1 x ø16 soft shaft (6-meter long)
• 7 x ø16 soft shaft (2.3-meter long each)
• 1 x ø450 soft shaft holder

Standard Accessories KW1800095:
• 8 x ø16 drills
• Accessories barrel
• Key
• Protection gloves

Standard Accessories KW1801264:
• Drill shelf
• Protection tube
• Key Ø5.5
• Protection gloves

3 IN 1 HAND HELD and UPRIGHT VACUUM CLEANER

Features:
- Powerful 400W Motor
- UV-C light KILLS dust mites
- Sensor UV light
- With Dual filtration system including a high efficiency particulate air (HEPA) filter
- Transparent barrel
- Easy to change into handheld mode
- Bed Beater will hit mattress at 3,000 beats per minute releasing dust mites
- Stylish design
- Complete with Fragrance Cartridges

Specifications:
- Voltage (V) 220
- Power (W) 400
- Weight (kg) 3.75
- Vacuum Power (Kpa) 10
- Noise (dB) 74
- Power Cord Length (m) 4.8
- Dusty Capacity (L) 0.34
- Vibratoe Beats 3000 per min

MULTI-USE, easily converts into a hand-held vacuum. Simply remove the 'dust mite head' and use a comprehensive array of tools to create a hand-held vacuum cleaner for those quick household clean-ups.
### Features 10100235:
- Blow Function
- Safety switch
- Low Noise
- Economic filter

### Features 10100236:
- Low Noise
- Carpet Cleaning
- Crevices and corner cleaning
- HEPA Filter
- Blow Function
- Power tool socket
- Accessories storage

### Features 10100237:
- Metal Barrel with Electric – shock safeguard
- Safety Switch
- Blow Function
- Power tool socket
- HEPA Filter

CARPET BLOWER, SCRUBBER and POLISHER

CARPET BLOWER

Features:
- Carpet and pad drying
- Other heavy-duty air circulation needs
- 700 watt motor making it the most powerful carpet drying fan.
- 3 speeds allows you to use the fan at its fullest potential depending on your needs.

3 IN 1 SCRUBBER, POLISHER AND VACUUM

Features:
- 3 in 1 Floor Cleaner (for Scrubber, Polisher & Vacuum)
- Scrubber and Polisher with 800W Cyclonic Bagless HEPA Filter Vac delivers a complete floor cleaning solution.
- The polisher delivers 2,200rpm on the contra-rotating discs to clean, scrub and polish your hard floors.
- Detach the cyclonic vacuum to vacuum hard floors before or after polishing.
- Adjustable Handle (for cleaning & polishing position)

SCRUBBER and POLISHER

Features KW1800303:
- Handy and compact internal structure
- Beautiful appearance
- Triple epicyclic gear
- Air cooling motor
- Double capacitor design
- Multiple function such as cleaning carpet and floor, wax removing and low speed polishing

Features 10037929:
- The machines features convinient operation, safe use and excellent cleaning effect.
- It is suitable for cleaning the carpet, floor, low speed polishing for various types of floor and refitting of stone surfaces for hotels, restaurant, office buildings and exhibition halls.
- Accessories : soft brush, hard brush, pad holder, water tank.
SCRUBBER and POLISHER

HIGH SPEED POLISHING MACHINE

Features:
- Beautiful and fashionable appearance.
- Designed for polishing the floor of all kinds of stone materials
- 1500rpm rotating speed
- Mirror shining result after waxing and polish

SCRUBBER, POLISHER and GRINDING MACHINE

FLOOR SCRUBBER DRIER

Features:
- Suitable for all application in hotel, warehouse, showroom, hall, etc.
- Easy control by mechanical parameters display
- Large water tank capacity
- Equipped with brushing disc shield to keep water still inside the sewage

Accessories included:
- KW1800734 Brush for KW1800667
- KW1800733 Pad Holder for KW1800667

FLOOR GRINDING

Features:
- Safe, reliable easy to operated
- Adjustable steering levers height
- Suitable for work in terrazo, marble, granite, concrete floors etc.
- Equipped with 9 driving pad
- Equipped with weight iron 18kg (2pcs)

**Home Use**

- **Induction Motor**
- **Carbon Brush**
- **Features 10100227 & 10100228:**
  - 3 Axial-Piston Wobble-plate pump
  - Tempered stainless steel plungers
  - Total Stop System
  - Built-in Thermal Protector
  - Light Weight and handle for Easy Movement
  - Rotary ON/OFF Switch For Convenient use

**Standard accessories 10100227 & 10100228:**
- Spray Gun with Adjustable spray nozzle
- Water Inlet Screw
- Nozzle Cleaning pin

- **Features 10100229, 10100230 & 10100231:**
  - 3 Axial-Piston Wobble-plate pump
  - Tempered stainless steel plungers
  - Total Stop System
  - Built-in Thermal protector
  - With wheels and handle for easy Movement
  - Rotary ON/OFF Switch For convenient use

**Standard accessories 10100229:**
- Spray Gun with Adjustable spray nozzle
- 5m water Outlet pressure hose
- 5m Power cord with plug (cable)
- Water Inlet Screw
- Nozzle Cleaning pin
- Built-in Detergent tank

**Standard accessories 10100230 & 10100231:**
- Professional trigger Gun with Adjustable spray nozzle
- 8m water Outlet pressure hose
- 5m Power cord with plug (cable)
- Water Inlet Screw
- Nozzle Cleaning pin
- Built-in Detergent tank
- Detergent flow control

**Features**:
- 10 HP key start diesel engine
- Heavy duty grade direct drive brass manifold triplex pump
- 8 mm (5/16") x 10 m (30 ft) high pressure hose
- Quick disconnect nozzle tips size 4.0, spray patterns 0, 15, 25, 40 and soap
- Professional trigger gun with safety lock and 20 inch stainless steel wand
- 10 inch pneumatic wheels
- Powder coating heavy duty four wheel frame
- Down stream low pressure detergent injector

### Optional Accessories

**High Quality Fuel Filter**

**Heavy Duty quad-ruplex cogged belt drive system, with self-tight device to prevent slippage**

**Energy efficient top fired powder coated heat exchanger**

---

**HEATER INSIDE**

**PANTENDED EMF SYSTEM**

**Made in USA**

**172 Bar**

---

**EMF (Electro Magnetic Firing System)**

**Triple Air Flow**

---

**HOT WATER HIGH PRESSURE**

**REDUCE CLEANING TIME UP TO 40%**

---

**Accessories Included:**

- Fuel Filter
- Heavy Duty quad-ruplex cogged belt drive system, with self-tight device to prevent slippage
- Energy efficient top fired powder coated heat exchanger

STEAM CLEANER and SCRUBBER DRIER

STEAM CLEANER

![Steam Cleaner Image]

Accessories Included:

- Simple and practical thorough cleaning of the suction filter
- The recovery tank can be effortlessly pulled out for easy emptying
- Periodic cleaning of the squeegee hose to ensure efficient suction
- For excellent drying performance, the squeegee rubber should always be kept clean. When worn out, the squeegee rubber are very easy to replace

Features:
- Easy to use
- No Chemical needs
- Multiple function use, such as glasses, stainless steel, bathroom etc

SCRUBBER DRIER GENIE E

![Scrubber Drier Image]

Genie is suitable for cleaning small-size and congested areas: offices, restaurants, coffee bars, wellness centres, hairdressers, boutiques, launderettes, school rooms, GP, dental and vet clinics, chemist shops, nursing homes, theatres, kitchens, laboratories, supermarkets, butchers’ shops, railway and underground trains, airports, dwellings, hotels etc.

Genie is a small walk behind scrubbing machine ideal for easy automation of mop cleaning systems.

Results are immediately evident, cleaning times and running costs are drastically reduced. Operator fatigue and repetitive strain injury are considerably lessened and productivity is exponentially increased.

Genie revolutionises the traditional cleaning market, considering that 90% of up to 1000 sqm areas are still cleaned with extremely expensive and poorly effective manual systems.

The relief valve on the solution tank cap ensures constant water flow to the floor for even cleaning results

Thanks to the automatic squeegee and brush adjusting system, the machine can automatically compensate for uneven floors

Automatic brush coupling system. For automatic brush coupling and release, just apply a light impulse to the safety switch that is fitted on the handle bar

Simple and practical thorough cleaning of the suction filter

The recovery tank can be effortlessly pulled out for easy emptying

Periodic cleaning of the squeegee hose to ensure efficient suction

For excellent drying performance, the squeegee rubber should always be kept clean. When worn out, the squeegee rubber are very easy to replace

SCRUBBER DRIER IMX B with BATTERY

**Maximum Adjustment Possibilities Thanks to The New Squeegee Coupling**

That is on the back of the machine conveniently positioned lever are controlled through the scrubbing head assembly that is on the back of the machine.

**Easy To Use**

**And To Maintain**

Engineered to be easy to use and to maintain, it reduces time spent for cleaning increases productivity.

**Low Ownership Costs**

Technological innovations, components lifetime and reliability help to lower ownership costs, improve the bottom line and afford a quick return of the investment.

**It optimizes the use of natural resources**

The activation of eco mode device allows to reduce water, detergent and energy use, reducing cleaning costs.

**It increases safety And cleaning performances**

The compact design of IMx ensures high visibility during manoeuvres, and while cleaning along walls or around obstacles.

**Maximum Sanitization**

Thanks to the KNC system, also employers feel more at easy as there is no need to undergo health checks.

Thanks to the KNC, it is possible to operate also in highly noise-sensitive environments.

Noise pollution-induced stress of operators is prevented and productivity increased.

**Thanks to the KNC system, also employers feel more at easy as there is no need to undergo health checks**

**Maximum Water Refill - Maximum Comfort**

The dripsfree hose for water filling can be directly connected with the tap, to save time and to make the activity easier.

The measuring cap of the tank allows to pour the proper detergent quantity, avoiding wastes or excessive use.

**No downtime**

Parts needing daily maintenance are yellow colored to be easily and quickly identified and cleaned, without losing time.

**Keep economic cleaning and running cost always under control**

**Water and detergent saving up to 50%**

**Higher operator productivity and less downtime**

**Uniform cleaning result all over the surface**

**No inconvenient adjustments required for the operator and no waste of product**

**All type of detergents are good to use and can be easily replaced whenever required**

**Perfectly suitable for any cleaning requirement**

**Dramatically reduced floor slipperiness**

**Maximum Sanitization**

Thanks to the KNC system, also employers feel more at easy as there is no need to undergo health checks.

**Thanks to the suction motor being fitted in the cover of the recovery tank, thorough cleaning of the tank is ensured.**

**Maximum Ease of Drive**

The new MMX comes with the new KNC system as standard-equipment which guarantees sound pressure lower than the standard ones requested by the safety regulations.

The activation of eco mode device allows to reduce water, detergent and energy use, reducing cleaning costs.

**Low Ownership Costs**

Technological innovations, components lifetime and reliability help to lower ownership costs, improve the bottom line and afford a quick return of the investment.

**User Friendly**

Brand new steering wheel designed to ensure easy, comfortable and manageable use.

**Low Noise Emissions - 54 dB (A)**

Keeps the sound pressure levels extremely low, it can even be used in places with strict noise restrictions (such as hospitals, etc.), without disturbing the surrounding environment.

**Safety**

Low centre of gravity and optimal weight distribution to guarantee maximum stability, even when climbing ramps.

**Designed to keep the investment value high overtime**

The parts requiring daily maintenance are distinguished by their yellow colour. At the end of the work shift, the operator can quickly and easily identify the parts to be sanitised, without wasting time. This increases machine efficiency and maintains its value over time. All the components are protected inside the main part of the machine. This reduces the risk of potential damage (and the relative repair costs) in the event of accidental impacts, thus ensuring a longer service life.

**Energi Saving**

The Eco Mode function uses a work configuration that reduces noise levels and ensures energy and water savings during maintenance cleaning.
For Maximum Performance
The reduced turning circle allows the Mr to easily turn around in corridors or supermarket aisles.

Low centre of gravity for optimum stability. Capable of ramp gradients up to 18%.

Perfect for effective wall to wall cleaning.

You Can Start Working with Just 3 Quick and Simple Operations!
- Sit on and Start!
- Turn on water and lower the brush head and the squeegee.
- Go.

Can Clean 1 sq.m of Floor for Just 1 cent*
Up to 4 hours of NON STOP work, with:
1 fill of water + 1 full charge!

Time Saving For Cleaning Operations
It has been calculated that for the maintenance cleaning of a 3,000 sq.m site working daily 5 days a week and 45 weeks a year (225 washes/year), THERE IS AN ADDITIONAL TIME SAVING OF 40% compared to a walk-behind scrubbing machine.

They Have Everything You Need with The Necessary Quality..... For Safety

Shock Proof
Automatic swing-in of the brush head when accidentally impacted.

Break Away
When accidentally impacted, the squeegee is uncoupled to prevent dangerous situations.

Thanks to the very low acoustic pressure level cleaning activities can be performed even in highly noise-sensitive environments such as in nursing homes, hospitals and public areas, without disturbing the environment or the people who live in it.

Sweeping machines that are user-friendly, comfortable, affordable and versatile, suitable for all types of dirt, both indoors and outdoors.

Guaranteed Cleaning Results, Thanks To The Clever
- Flap lifting device, activated by a pedal, make easier the collection of coarse dirt
- Large size filter, up to 6 m² of filtering capacity for FS800 model
- Electrical filter shaker with vacuum exclusion, to clean the filter or work on damp surfaces
- The floating and self-adjusting central brush with cusp shape (hydraulically moved, in the internal combustion engine version) maintains its contact with the surface
- NO DUST LIFTING SYSTEM

The suctioned and filtered air comes out through the rear grille positioned in a very high area. In this way, the dust deposited on the surface around the machine is not lifted, guaranteeing excellent cleaning results.

Guaranteed reliability
The versions with internal combustion engine (FS800 B) are equipped with a complete hydraulic system and have no electronic cards. This means increased reliability when working in particularly dirty conditions. In the battery version, the entire battery/motor compartment is protected against the infiltration of dust. The electric system is located in a protected area at the front of the machine, where it can be easily accessed.

In the battery version, the various functions (such as brushes or traction) are activated by specific motors. Energy consumption is based on the actual use of each function, while always guaranteeing optimum efficiency and yield. In this way, the degree of autonomy can reach 5 hours; in other words, 20,000 sq.m. emission-free cleaning.

Possibility to work for up to 5 hours thanks to the KRISBOW Energy Saver system

Guaranteed reliability
The versions with internal combustion engine (FS800 B) are equipped with a complete hydraulic system and have no electronic cards. This means increased reliability when working in particularly dirty conditions. In the battery version, the entire battery/motor compartment is protected against the infiltration of dust. The electric system is located in a protected area at the front of the machine, where it can be easily accessed.

In the battery version, the various functions (such as brushes or traction) are activated by specific motors. Energy consumption is based on the actual use of each function, while always guaranteeing optimum efficiency and yield. In this way, the degree of autonomy can reach 5 hours; in other words, 20,000 sq.m. emission-free cleaning.

Possibility to work for up to 5 hours thanks to the KRISBOW Energy Saver system

In the battery version, the various functions (such as brushes or traction) are activated by specific motors. Energy consumption is based on the actual use of each function, while always guaranteeing optimum efficiency and yield. In this way, the degree of autonomy can reach 5 hours; in other words, 20,000 sq.m. emission-free cleaning.

Guaranteed Cleaning Results, Thanks To The Clever
- Flap lifting device, activated by a pedal, make easier the collection of coarse dirt
- Large size filter, up to 6 m² of filtering capacity for FS800 model
- Electrical filter shaker with vacuum exclusion, to clean the filter or work on damp surfaces
- The floating and self-adjusting central brush with cusp shape (hydraulically moved, in the internal combustion engine version) maintains its contact with the surface
- NO DUST LIFTING SYSTEM

The suctioned and filtered air comes out through the rear grille positioned in a very high area. In this way, the dust deposited on the surface around the machine is not lifted, guaranteeing excellent cleaning results.

Guaranteed reliability

Suitable for removing the most stubborn dirt on outdoor and indoor surfaces like big stores, squares and car parks up to more than 10,000 sq.m/h.

To guarantee maximum driving comfort for the operator at all times and maximum reliability, all the main functions are hydraulic:

- Traction
- Lifting and emptying the rubbish container
- Rotating the brushes
- Vacuuming dust

Suitable for removing the most stubborn dirt on outdoor and indoor surfaces like big stores, squares and car parks up to more than 10,000 sq.m/h.

RIDE ON SWEEPER

RIDE ON STREET SWEEPER FS-80D & FS-100D

Designed to offer great accessibility which makes routine maintenance jobs quick and easy to do

The FS80 & 100D sweepers are designed to provide maximum access to the engine compartment (in the Diesel version). Thanks to this accurate study, any type of routine and extraordinary maintenance can be done inside the machine without ever being obstructed. Just the checking of the oil or changing the filters for instance, in the motorised version, are now so extremely easy.

- The position of the hydraulic filter (10 micron) has been studied to facilitate maintenance operations. A second filter is positioned inside the oil tank.

Conceived to guarantee safety and reliability under all conditions of use

The pressure and height adjustment of the central brush are controlled simply by the knob near the brush. Brush height adjustment depending on wear can, therefore, be done very easily. This ensures a longer brush life cycle.

The side brush retracts in the event of accidental knocks, thus avoiding all possible damage. The brush's slanting angle can be adjusted to better adapt to cleaning along borders, etc.

Besides reducing mechanical stress, the big diameter wheels also make working more comfortable. Operating features remain unaltered thanks to their sturdy support. Both versions are equipped with hydraulically controlled brakes (standard supply).

The suction turbine attached directly on the rubbish container is operated by the hydraulic motor, guaranteeing performance constancy over time.

The central brush is the floating type and self-adjusts to keep in contact with the ground all the time. FS80 & 100 can work on 20% gradients.

No maintenance thanks to the periodical use of the electric filter shaker

A fabric bag filter with a large filtering surface - 7 sq.m (FS80) - 8 sq.m (FS100) - lasts a very long time, and ensures excellent results even in environments where there is a lot of fine dust, thanks to the power filter shaker. The filter is easy to remove without the use of tools, to check or replace it. No maintenance is required thanks to the periodical use of the electric filter shaker. Filters in fabrics for specific applications are available upon request.

ROAD SWEEPER F4

Road Sweeper F4 Twin Action, 3.5 m³, combines the performance of two machines in one single particularly compact machine, thus providing two actions in one solution and ensuring maximum quality results.

The innovative combined “Twin Action” system developed by Road Sweeper F4 includes the central brush and two screw conveyors which operate simultaneously with suction operation to guarantee maximum efficiency in dirt collection: while mechanical action collects waste, suction action draws in even the finer dust.

Productivity

The mechanical action consists in the movement of the central brush (1) which collects the material from the ground and conveys it to a hopper where the two screw conveyors (2) bring it into the central area of the container (3). At this point, by means of the suction action (4), the material is raised to the collection hopper (5), while the sucked air is filtered (6) and returned to the environment perfectly clean (7). Twin Action uses the central brush continuously, following perfectly the street profile, ensuring higher quality cleaning because it is uniform for the entire width of the brush and higher productivity because it can clean more quickly than a conventional sweeping machine which has to use the two side brushes.

Designed to keep the investment value high over time

Road Sweeper F4 Twin Action the designers chose to install the Industrial Open Power engine version which is specifically sized for continuous applications at constant speed with reduced consumption: for this reason it is suited to continuous heavy-duty work, even for a daily cycle of eight hours non-stop.

Road Sweeper F4 Twin Action integral steering system on all 4 wheels together with the reduced dimensions provide great manoeuvrability even near walls or fences, and guarantee the necessary ease of handling to operate in places where space is limited such as historical town centers or cluttered areas, at the same time guaranteeing maximum vehicle stability during transfer even at the highest speed.

The cab is comfortable because it is spacious and insulated with anti-vibration supports. It is comfortable to drive, and the large windscreen provides maximum external visibility for the operator, making manoeuvring and control over the collection area easier. On request the machine can be customized with a climate control system, radio and useful colour camera which covers the rear of the machine in order to aid reversing and emptying operations, also allowing constant monitoring of cleaning effectiveness.

**OPTIONAL ACCESSORIES**

- Air conditioning
- Radio with CD player
- Rear colour camera
- LH side brush Ø (mm) 700
- Third travelling side brush Ø (mm) 700
- Spray system on the brushes complete with tank (l) 200
- Suction hose Ø and length (mm) 100x4500
- Bin lifting maximum height (mm) 1800

RIDE ON CITY SWEEPER

Very comfortable working experience with wide vision driving cabin, ergonomics seat and joystick. Outstanding and flexible handling for operational in narrow space or road with interlinkage mode. Streamline appearance. Powerful sweeping ability, easily collect debris, leaves and mineral water bottles. Prevent dust emission with water atomizing aspirating device. Optional 5 m extended vacuum hose to improve absorbing and sweeping ability. 25 HP combined with four-wheel hydraulics drive ensures slope and step climbing ability and moving on uneven roads. All function parts can be changed without tools within four minutes. It’s simple and highly efficient.

**Optional Accessories :**
- High pressure cleaning system
- Hydraulic electric welding
